

# THE TIMES.

VOL. IV.—NO. 24.

MOOSE JAW N. W. T., FRIDAY, NOVEMBER 25, 1892.

HAMILTON, LANS.  
Printed and Published by

## T. W. ROBINSON'S.

We sell the Cranby Overshoes—Ladies', Gents' and Childrens, they are the best in the world.

We also sell the Cardigan in Ladies' and Childrens.

Felt Boot and Slippers of all kinds; by far the largest assortment we ever carried.

Fur Goods of all kinds,

Coats, Caps, Storm Collars, &c.

Boys' Overcoats—we have all sizes and kinds.

## T. W. ROBINSON'S.

## I. M. CHALMERS,

## NEW GOODS FOR FALL AND WINTER

We have received an elegant range of Ladies' Mantles. Superior in quality and workmanship to any that has ever been shown in this District. Also in dress goods, Melisa and Righy Waterproo Cloth, we are far ahead of all competitors in Fancy Goods our stock is complete, comprising Fancy Silks and Satins of the finest texture. Berlin and Zephyr Wool. Stamped Linen Felts, Etc. Every Lady should see our Stock.

## I. M. CHALMERS

### R. C. MACDONALD.

Fruits, Confectionery, Canned Goods, Teas, Tobaccos, Cigars, Pipes, etc., etc.

Ice Cream and Oysters in Season.

Fine assortment of Japanese Goods.

MOOSE JAW, N. W. T., 1892.

### WHOLESALE

### Wine, Liquor and Cigar Store.

I have just received my winter stock of the above goods, consisting of the finest brands of the best known manufacturers in both the foreign and home markets. So if you must or will drink, take my advice and imbibe only the choicest liquors procurable in the wide, wide world.

Stock up for Xmas.

O. FIELD.

### HON. T. M. DALY.

#### Interviewed By a Times Representative.

The Hon. T. Mayne Daly passed this point on Saturday evening's express. Mr. Daly was able to move around on crutches under the vigilant care of Mr. Chisholm, his private secretary. His fractured ankle is encased in a plaster of Paris bandage, and is doing remarkably well.

Interviewed by a representative of the Times, Mr. Daly said that he was impressed with the kindness and hospitality of the people of the Territories. At Moosemin, at Regina and in Calgary, indeed wherever he had stayed, he had been treated right royally. He spoke particularly of the people of Calgary and said that they certainly merited the title "cheerful."

"Do you not find a great improvement in towns along the line Mr. Daly?"

"A very marked one. It is almost impossible to realize the changes that have taken place in the last few years. I am sorry that my accident has deprived me of the pleasure of seeing your town in daylight. From what I have heard, however, in Regina and elsewhere, the growth of Moose Jaw has been remarkable.

Asked as to his probable movements, Mr. Daly said that his accident had altered his programme so materially that it would be impossible to say positively what his movements would be. He said further that while he had not committed himself on the subject of Northwest immigration he would endeavor by every means in his power to fulfill the expectations of the people of this country in this regard.

At this juncture the train commenced to glide and the Times withdrew.

### STARTLING NEWS.

#### The Powers of the Assembly to be Reduced—Executive Committee May be Abolished.

MONTREAL, Nov. 22.—The Star, commenting on the calling together of the Northwest Assembly, says it can now for the first time give publication to the startling information that in consequence of the recent squabble and its results, the Dominion Government has by order-in-council withdrawn from the Assembly the increased powers given to it during the last two years and all the money voted by parliament for the expenses of government in the Territories and for schools has been transferred to the credit of the authorities at Ottawa, and for the past five weeks all the expenditure has been made by cheques signed by Governor Royal and his secretary. This piece of information has been hitherto kept in the dark in Cayley's interests, but in view of the complete failure of his Government there is no longer any reason for this secrecy and the facts are given to the public. It is reported, moreover, that the Dominion government has disallowed the ordinance providing for the executive committee, as it went further than their legislation contemplated.

### Burgess in Winnipeg.

WINNIPEG, Nov. 22.—A. M. Burgess, Deputy Minister of the Interior arrived in Winnipeg this morning.

OTTAWA, Nov. 21.—There are rumors afloat to the effect that the Toronto Mail will shortly resume its old position as the organ of the Conservative party. Mr. Bunting, manager of the Mail, has spent a good deal of time in Ottawa during the past month and it has been surmised that his visits have not been unconnected with the scheme, which involves the suppression of the "Empire" or its absorption by the Mail, and the restoration of the last mentioned paper to its old status as chief ministerial organ.

### Elected by Acclamation.

MOOSEMIN, Nov. 22.—Mr. W. W. McDonald, the nominee of the Conservative Convention has been elected by acclamation as member for Eastern Assiniboia. Mr. McDonald was born in the county of Missisquoi, Quebec, of the U. E. loyalist stock, in the year 1814, so that he is still in the prime of life, and vigorous in mind and body. After receiving an education in the schools of the county he went to court Dano Fortune in the busy metropolis of his province and for some twelve years was engaged in the business. Leaving Montreal, on the 16th of July, 1882 he arrived in Moosemin, and ever since has conducted a large farm at Fleming. Mr. McDonald, as a successful farmer, a Northwest pioneer, the head of a large family and a public spirited citizen full of energy, should represent the most populous and important of Territorial constituencies with credit to himself and the electors.

### Canadian Seiners to be Prosecuted.

WINNIPEG Free Press.—An Ottawa dispatch is authority for the statement that it is the intention of the Imperial Government to prosecute all Canadian sealers who entered Behring Sea in defiance of the proclamation enjoining observance of the moratorium. Not a decent Canadian between the two oceans will raise a word of protest; the hope will rather be that the offenders will be punished severely, as warning to moderate their greed in future. The Behring Sea affair has difficulties enough without Canadian complication then by open violations of an international agreement. It is not creditable to us as a people that while efforts at a settlement are being made, masters of Canadian vessels should put their own wretched, illegal gains in the balance against it, to the peril of friendly relations with our neighbors and to the scandal of a reputation which Britons everywhere hold dear.

### He Yelled for Victoria

CHICAGO Canadian-American: On Wednesday a funny incident marked the work of the men engaged on the Canadian building at the World's Fair. The latter is adjacent to the British building, on which there is a flag staff. This was being tested and one of the workmen engaged on the Dominion's headquarters, seeing the flag going up yelled out in a stentorian voice "God save Victoria, long may she reign." His fellow workmen were nearly startled out of their boots by the yell and the eagle on top of the Administration building had hard work retaining his footing. Another one—a Scotchman—in a voice that was heard with heart-rendering feeling by Miss Columbia proclaimed that "that isn't a four-hundred year old flag," and then there was a Wagner-like hullabaloo which lasted several minutes and put onlookers in mind of a Democratic ratification meeting. When it had ended an American workman was cruel enough to ask the jubilant Britisher if they remembered 1776—or words to that effect.

### The Editor Acquitted.

MONTREAL, Nov. 21.—The trial of the action brought by Alexander McDonald, managing director of the Montreal Elevating company against Henry Mason, editor and proprietor of the Trade Bulletin, for alleged libel in an article in that newspaper in August, 1891, in which certain comments were made upon McDonald's conduct in reference to the prosecution of two men caught stealing from the elevators, resulted in the acquittal of defendant.

### The North-West Assembly.

REGINA, Nov. 21.—His Honor the lieutenant governor has called the North-West Assembly to meet on Wednesday, December 7th, for the transaction of business. "The Opening" will be as interesting as any that has taken place for years.

### THE MOOSE JAW DISTRICT.

#### Opinions of a Practical Eastern Farmer.

Mr. Israel Morse, ex-mayor of St. Thomas, who last summer in company with Daniel Marlett, of Elgin Co., made a personal inspection of the St. Thomas District, writes the following in the St. Thomas Journal, under date of Oct. 17th, 1892:—

Some of my friends in St. Thomas wished me to drop them a line and let them know something of my trip and opinions of this country. Mr. Daniel Marlett and myself left St. Thomas on the 1st inst. via the C.P.R. for Calgary. The greater portion of the route after leaving Barrie, and until nearing Winnipeg, is scarcely worth noticing excepting for its scenery. It is a rough barren country. In fact, I was reminded of the Israelites of old journeying through the wilderness before reaching the promised land. We, like them, succeeded and eventually reached Winnipeg, which is a fine and busy city. From Winnipeg to Moose Jaw is mostly farming land. It is a very fine country, and there some good farms and rich lands can be seen anywhere. The land around and north of Moose Jaw is also well suited for farming purposes. The Government lands are taken up for over twenty miles to the north. The farmers, as far as I can see and learn, are doing well and acquiring good homes for themselves. Would think that any industrious person coming to this country cannot help succeeding. There is no doubt that this country is destined to become the bread basket of Canada. The different towns along the C.P.R. all seem to be growing and prospering. They exceeded my expectations. From Moose Jaw we drove across the prairie southward, a distance of twenty-five miles to Mr. George Williams' ranch. He has a fine ranch consisting of several thousand acres and supplied with an abundance of good spring water. He has a fine stock both of horses and cattle, and cannot help securing good returns from his investment. Mr. Williams formerly lived in Fingal. He went with us to a horse ranch some thirty miles further on, which is owned by Mr. Wm. Holmes, whose parents live in Toronto. He started his ranch five years ago with sixteen hundred dollars, and now has quite a large number of horses and has very little to do. After spending two nights with him we started on our return trip and on our way Mr. Marlett located for himself a ranch for stock raising, which is very nicely situated, with good water. It is about thirty miles from Moose Jaw. We expect to start to-morrow for Calgary and we will stop off here again on our return and will build a house on Mr. Marlett's ranch, so as to enable him to hold his claim until he can come up in the spring and occupy it. We have had very fine weather ever since we have been here and fine sport. Game, such as antelope, geese, turkeys, ducks, is very abundant here, so that we are living well and having a good time generally.

### Should thank God for his mercy.

If the day appointed by the Government is to be merely a day of sport, the assembly should memorialize the Government to change the name or stop making appointment whatever. Theoretically the present arrangement is good, practically it is becoming a mockery. If matters go on as they are, what is called Thanksgiving day will soon be nothing more than a day of amusement—a day for sport, with betting and equally heavy drinking. Surely this notion has no effect of accounts for without officially acknowledging, by calling a day of that kind a thanksgiving day. The General Assembly has often sent a good deal of time on matters far less important than national praying.

### WORLD FAIR EXHIBIT.

#### Reaction Among the Farmers.

Mr. A. G. Thorburn, who has been appointed by the Dominion Government to take charge of the Territorial exhibit for the World's Fair next year was in town on Tuesday.

In interview Mr. Thorburn said: "And that throughout the length and breadth the farmers are exceedingly diffident about the exhibit. The Government has gone to large expense in the matter and has arranged for speedy transport. Nevertheless it seems well-nigh impossible to secure the co-operation of the farming community."

It is of the utmost importance that such an exhibit should be sent to Chicago as will turn the eyes of the civilized world to our vast Territories. Every natural product should be on exhibition there. Every article of manufacture should be shown.

"Do you purpose visiting Moose Jaw again, Mr. Thorburn?"

"It is my intention to be present at the awarding of the wheat prize offered by your member, Mr. Ross. I think the plan adopted by him is a remarkable good one."

Mr. Thorburn addressed the Moose Jaw Board of Trade on Tuesday evening, on the subject of the exhibit.

### The Wolves Must Go.

Toronto World: A ranchman from Macleod, Alberta, who arrived here yesterday, stated that the energetic means have been adopted to rid the territory of wolves which have alarmingly multiplied in number of late. Some years ago most of the larger ranches, with the idea of keeping down the wolves, imported bloodhounds supposed to be capable of carrying out the plan. Since then the wolves have increased enormously, being now almost as plentiful as they were in the old buffalo days, and alarmingly proving that where they were supposed to be the dogs were not in it. Such being the state of affairs it came to the general understanding that some more energetic policy of extermination must be suggested, the loss of sheep and other ranges from wolves alone having become a most serious pest to the prairie balance sheet. With this end in view most of the ranchers throughout the great Willow Creek district have recently banded themselves into an association and they propose to offer a bounty upon every wolf of 45, in addition to which they will purchase the hide of the dead animal, making in all between 37 and 40 per head. It is proposed to form a fund for the payment of the bounty, by levying a tax of 30 cents per head, not per acre, and 10 cents per acre for small calf and sheep breeding. The association have complete lists of every wolf and in the possession of a good many traps, such about the country, and are now at work, and that a period of a week or so will be sufficient to rid the country of the pest.

But mastered by some modern term,  
Not swift nor slow to change but firm."

FRIDAY, NOVEMBER 25, 1892.

## THE SOO ROAD.

A peculiar trait, and indeed one not to be condemned in the people of Regina is their tenacity. When they once set their hearts on obtaining a thing they either get or they know the reason why. A striking example of this is the famous "Soo" Road. Despite the fact that Mr. Van Horne told their delegates that they couldn't have the road, despite the fact that the plan of the road has been registered and the connecting point with the main line has been fixed at Pasqua they, hope against hope, and swallow eagerly the yarns told them by the graders who arrived in Regina last week. These men told them in joke that the road, which by the way is the straightest in America, had turned at a point about thirty-five miles south east of Regina and that about five miles had been graded in a direct line for the "Queen City." The effect of this announcement may be easily imagined. The good people of our sister town fairly hugged themselves.

There is a lesson in this for the people of Moose Jaw. Here is a people that have fought for their town through thick and thin, who have endeavored by every means in their power to advance their claim for this road,—a people, too, that have done all this in the face of tremendous odds. Had the position of affairs been reversed, the majority of Moose Jaw people would have viewed the construction of the road into Regina with complacency. It would indeed be well if some of the Regina spirit could be instilled into the people of Moose Jaw.

## DEPRESSION OF SPIRITS.

Low spirits are a common excuse for a great deal of selfishness. It is certainly a matter of doubt whether any one has a right to be melancholy in a world so full of the graciousness and generosity of Providence, and it is a miserable piece of egotism to thrust one's low spirits upon others.

Melancholia is undoubtedly a disease, but it is one of those diseases which is largely, if it is not wholly, under control of the will, contradictory though the statement may seem. There are many diseases recognized by physicians as brought about purely by patients allowing themselves to drift into morbid conditions of mind. Even dreaded scourges, like typhus fever and cholera, are known to be induced by morbid fear. Constantly brooding over some fancied wrong or imaginary slight, showing an exaggerated state of selfishness which is too often considered super-sensitiveness, will readily induce that condition of mind which we know as melancholia.

The selfish idler is condemned by every one; but the one who wastes his life in the most unfruitful manner,

ner, groaning and complaining till he becomes a chronic hypochondriac, often passes for a hard worker from the very excess of trouble he takes to find trouble. As a matter of fact, such people accomplish very little real work in the world. They are greater wasters of time than the most flippant idler of the world, because they take away from the nerve force and the life of others. Minus quantities, they represent much less than nothing, for they reduce the working power of all around them, enervating them by their continuous dole and plaint.

Strange as it may seem, a disposition to melancholy often appears in children, and if not discouraged may develop into a fixed habit in later life. There is no cure better for morbid tendencies than some method by which the individual can get outside of himself and forget for a time his own selfish interests and desires. Pevishness in a young child should be treated as a serious fault, yet in nine cases out of ten, the fretful child is petted, and so rewarded for his fretfulness; and the fretful child makes the complaining, melancholy man or woman.

The best prescription for depression of spirits, generally, is work—work which is all absorbing. The poor who drudge for a living seldom develop chronic diseases of the nerve and the mind, despite the greater hardships to which they are subjected. How often it happens that the woman of wealth, who believes herself to be an invalid, and is suddenly thrust into poverty, is able to meet the emergency and forgets all the morbid tendencies in the necessity which calls forth her supreme strength! A certain way of paralyzing our faculties is to allow them to waste with disuse. Employment keeps away the rush. It keeps the mind and heart alive to the interests of the day. It has been said that the reason why so many old men break down and become childlike is because they abandon business, and thus lose much of their everyday interest in the world around them.

It is no uncommon thing, to-day, for people who are quite advanced in life to take up courses of study, and successfully pass through them. All such occupations serve to keep the interest alive in something besides mere selfishness, and do more to ward away the "fumes of dusky melancholy" than all the herbs in the old wife's pot, on which our ancestors relied. There is far less tendency to brooding now, in this active, work-a-day world, than there was formerly, when people had little to think upon but their pains and ills. The daily newspaper, the railroads and the telegraphs, which bind the interests of the world together in a common brotherhood, give now, to even the most ignorant person, but little time for selfish brooding. The melancholy maiden, with clinging skirts and uplifted eyes, of whom Mrs. D'Arbly wrote and Mrs. Hemans sang, is no longer a fashionable ideal, but has given place to the athletic woman with her robust health and practical nature.

## EDITORIAL AND GENERAL NOTES.

Here is an amusing news item in the current number of the *Printer and Publisher*:  
"Nicholas Flood, Davin has sold out the Regina Leader to J. J. Young, his editor."  
We must go from home to hear the news.

Notwithstanding the difficulty of obtaining prompt shipments of coal from the mines our local merchants are doing their utmost to meet the requirements of the coal trade in town.

The Dominion financial statement for October shows a surplus of \$4,638,611. A year ago it was \$3,404,330. The total revenue for October was \$3,340,310; expenditure for October \$2,172,138. The capital expenditure for four months is \$1,264,537, as against \$1,192,948 in the corresponding period last year.

The provincial legislature of British Columbia has, by a recent order in council, decreed that all sales of timber by the Government shall in future be conducted by public competition on lines similar to those adopted by the Ontario Government. This step may be taken as an evidence of the value placed by the province on its timber

resources and the necessity to conserve this wealth to the province.

The Regina Leader of a recent date publishes an interview with Cayley in which he says that he will advise the speedy calling together of the Assembly and that he will then place his resignation in the hands of the lieutenant-governor. We hope that such are his intentions. Should he do so it would be the first sane action on his part since the overthrow of Mr. Haultain's executive.

The Town Council for 1893 is a subject that is furnishing considerable food for discussion; and while as yet no names have been mentioned as possible candidates the opinion is popular that such a body of men should be elected as will devote their best energies to advance the interests of the town of Moose Jaw.

We have already suggested some schemes for local improvement that might engage the attention of the future council. The town has enjoyed a season of prosperity. Its growth this year has been commented upon by every visitor. It has arrived at that stage in the history of North-west town when its substantial prosperity is beyond a doubt.

It behooves the citizens of the town, therefore, to elect a council that will place our town on a footing with the best in the country.

The Statistician of the department of agriculture gives a summary of the final report of the Indian Government on the wheat crop of 1892. The total crop is put at 5,442,000 tons, or 203,168,000 bushels of lbs. This marks it as the smallest crop harvested in any year since annual estimates were inaugurated in 1884. In the final report of last year the crop of 1891 was stated at 6,842,000 tons or 255,384,667 bushels, but the present return changes the estimates for 1891 to 6,876,000 tons, or 256,704,000 bushels. On the basis of this revised estimate the crop of the present year shows a falling off from that of 1891 of 53,826,000 bushels, or 21 per cent. The area is returned at 24,088,000 acres, against the revised estimate of 26,576,000 acres harvested in 1891. The normal of average area under wheat is placed at 26,544,000 acres, showing a falling off of acreage in 1892 from the average of 2,456,000 acres. These figures indicate a yield per acre of 8.4 bushels for 1892, against 9.8 bushels last year, and an average, calculated from the normal area and outturn, as given, of 9.5 bushels.

British Columbia relies for her lumber trade in a large measure on the export to foreign countries. The financial depression, which has overshadowed South America for the past two years, is fortunately disappearing and this is an important field for British Columbia lumber. Naturally the people of the coast are anxious for the completion of the Nicaragua Canal. To-day the journey from Victoria to Great Britain is about 16,000 miles. The consequences of a change to probably 8,000 would be so far-reaching in results that it is difficult to imagine the impetus this measure would necessarily give to commerce on the coast, and especially to the lumber trade. A lumber journal of Melbourne, Australia, has estimated the boon it will be to the people of these colonies when they can receive their lumber from British Columbia via the projected canal in place of, as now, by the circuitous route around Cape Horn. British Columbia has an increased interest in Australian lumber trade at the present because of recent retaliatory legislation against the United States which practically shuts out Oregon pine, and conversely, enlarges the field for Douglas Fir.

At the railway congress lately in session at St. Petersburg the railway mileage of the world was presented in tabulated form. This showed that the mileage at the beginning of this year, was 167,755 in the United States, 14,082 miles in Canada, and 5,625 miles in Mexico and Argentine Republic. In Europe, the German Empire comes first, with 26,790 miles; France second with 24,310 miles; Great Britain third, with

22,685 miles; Russia fourth, with 19,345 miles. Wartenburg and Denmark are the countries which have made the least progress in the construction of railways since 1886, while in Asia, apart from the 16,875 miles of lines in India, the Trans-Caspian line recently constructed by the Russians is 895 miles in length, the Dutch colonies have 850 miles of railway, the French 65 and the Portuguese 34, while there are 135 miles of China and 18 in Persia. In Africa the colony of Algeria and Tunis comes first, with 1,640 miles; the Cape Colony second, with about 1,880 miles; Egypt third, with 965 miles; Natal fourth, with 341 miles, while the Orange Free State has 150 miles, and other minor states about 380 miles. In Australia, the figures are 2,703 miles for Victoria, 2,275 miles in New South Wales; 1,646 miles for Queensland; 1,875 miles for South Australia; 401 for Tasmania; and 1,950 for New Zealand. These figures are from the latest obtainable statistics, and show a material difference from those heretofore given.

One more fishery commission is to be added to the many that have gone before, most of them having previously originated in Europe. This time the commission is to be international, Canada and the United States being the two countries directly concerned. The commission is, it seems, an outcome of the conference which took place last winter between members of the Canadian Government and the authorities at Washington. One expert will represent each country on the commission and through him will be presented whatever information on the subject each government has collected within a given time, say the last two years. Close seasons and modes of destruction will be among the subjects of enquiry. Opinions change as to the sort of engines with which fish can be captured without wastefully or seriously reducing their number. Some twenty years ago, a British commission came to the conclusion that no amount of fishing, by any known engine of destruction, could materially lessen the quantity of fish in the sea. Even at that time there were reasons for doubting the accuracy of this view of the case, and now we believe no one is permitted to doubt, after he has examined the subject, that it is not borne out by the facts which experience has collected in recent times. We may expect that some restraint will, as a result of the commission, be put upon fishermen, for the purpose of preserving from serious deterioration the fisheries near the coasts of the two countries.—*Monetary Times.*

## WEDDING ANNIVERSARY.

The twenty-fourth anniversary of the wedding of Mr. and Mrs. T. D. Watson, of Springbank Rancher, was celebrated in a happy manner at their residence on Wednesday last.

Twenty-four years ago in an auld kirk at Edinburgh in fair Scotia these two youthful and loving hearts were united. A more ideal man and wife than Mr. and Mrs. T. D. Watson cannot be found in the District. Their kindness and hospitality to visitors is now a by-word.

As an evidence of their popularity, on the anniversary of their wedding, some twenty young men and maidens of the town drove out to their residence to extend their congratulations, taking with them valuable presents in silver, among which was noticed a handsome cake tray, a butter cooler, a card basket, napkin rings and other similar tangible evidences of well-wishes for the happy couple.

About 6 p. m. the guests enjoyed one of Mrs. Watson's substantial repasts, and the evening was spent in songs, readings, stories and in the merry dance.

The Times wishes Mr. and Mrs. Watson many happy returns of the day.

TOPICS OF THE DAY.

By request Mr. Lang publishes the words of the topical song, sung by him at the R. T. of T. concert last week.

TOPICS OF THE DAY.

We're going to have a little fun in a harmless sort of way, Because to-night I'm going to sing of Topics of the day; I'll sing about the Moose Jaw Band, its improving more and more, It amuses the boys, for it makes a noise like the ocean's mighty roar. The music it is something grand, They often play on the big grand stand: The small boy shouts to beat the band, You can bet your boots on that!

Our Moose Jaw doctor went down east, on a little trip for his health, And there he told some whopping tales of the Moose Jaw farmers wealth; He said that land was very cheap. The "Soe" was a dead sure thing, That a mighty boom would strike the town on the opening of Spring. He was only having a little sport, But immigration seems his forte, The papers published a full report, You can bet your boots on that!

The Moose Jaw Hunt Club every week ride out to kill a fox, And sometimes have some lively sport with badger holes and rocks, They follow the hounds for many a mile. They have hunting on the brain. They sing "A hunting we will go" and they all join this refrain: "Hunting now is all the go, You should hear us holler 'tallyho!' The foxes don't stand any show, You can bet your boots on that!"

A Moose Jaw man has a small wee wife, And to-day they had a fight, She heard that he'd been drinking, And was very very tight, And now he said: "You know my dear, That surely cannot be, You know I never take a drink, But always stick to tea. And we'll go to the concert to-night I vow, For the new town hall is open now, And they're going to have a big pow-wow, You can bet your boots on that!"

The other day a railroad man, Thought he'd leave his friends in the lurch, He was going to get married but you bet your life, He never went near the church, They never tumbled to his game, The thing was done so nice, He took his bride to the minister's house, And the knot was tied in a trice. That sort of thing couldn't be allowed, They organized a very large crowd, The *feu-de-joie* sounded very loud, You can bet your boots on that!

A circus came to town this fall, 'twas a pretty thing to see, But best of all was a little game, they played with a little pea, 'Twas lots of fun when five called ten and ten called twenty you know, But after you dropped a ten or two you thought it was time to go: Beside it other sport was tame, 'Twas a very very pretty game, You dropped your money just the same, You can bet your boots on that!

A Strange Character.

Pilot Mount Sentinel: Living amongst the half-breeds and Indians at Fort Ellice, or wandering amongst the natives far up the Assiniboine, in the vicinity of Fort Pelly, there is a very odd but excellent man, who acts unlike all other men. He belongs to some religious order and is a native of France; he is highly educated and is ever now possessed of a manner and polish that would grace a court. He has become an old man and the greater portion of his life has been devoted to the improvement of the wild native population of the North-west. After the manner of a hermit he lives in a rude log hut in the woods on the shores of the Assiniboine. Understanding the language of the natives, he instructs them in matters of religion, whitts them in their

sickness, relieves them of their necessities, teaches them the arts of civilization, instructs their children, stands by the death-bed of the departed, and devotes his whole time and energies to the welfare of the rude people among whom he resides. At one time his field of labor was in the country much further west, and when there he had become possessed of some horses and cattle. On moving to occupy his present station near Fort Ellice, he left all his stock to others, even his house and rude furniture, reserving only the pony which he mounted and rode away to his new field of labor. He must have a private income from some source, although he makes no display and seems as poor as those he lived amongst; but whereas of those to whom he is devoted voted get into difficulty, he often buys a cow or a horse from the man who is in trouble, and usually leaves the animal with the person from whom he made the purchase. If the truth were known there is little doubt but there is a stirring romance connected with the history of this singular individual. When publishing a paper at Hirdle, we often met the old man and were delighted and astonished by his conversation, admired his self sacrifice and benevolent humanity and were instructed by his example.

Detective Guarantee Company.

OTTAWA, Nov. 20.—R. A. Green-shields, barrister, and Detective Gross, of Montreal, are here securing incorporation for the Dominion capital stock of \$200,000. They propose to fit up residences, stores, etc., with electrical devices to aid in the detection of burglars.

Heavy Locomotives.

WINNIPEG, Nov. 20.—Engines 597 and 598 have been placed on the running list of the station, and will prove of great service in assisting the heavy traffic of the division. These powerful locomotives are of the largest class, and were built in the C. P. R. shops at Montreal during the present year. Every modern appliance which can conduce speed and power have been supplied in their construction, the eight inch axle being the largest size used for locomotives. Although a large number of C.P.R. built engines are in use on their extensive system these are the only two running from this section at the present time.

A Daring Robbery.

MONTREAL, Nov. 20.—A most daring highway robbery occurred yesterday afternoon a little above Coteau Landing. Yesterday D. O'Brien, of O'Brien & Son, contractors for section twelve of the Soulanges canal, came to town to draw cash out of the Quebec bank to pay their men. Mr. O'Brien took about \$4,202.25 in a valise. He left the city by train and reached Coteau Landing at ten minutes past six o'clock. Here his father was waiting his return to drive his son home. When about half way to their destination they encountered three men who stopped them and one of them said: "How do you do, Mr. O'Brien can you give us any work?" Mr. O'Brien said that he did not know, but to call the next morning. They were then in the act of driving home when another of the party drew a pair of bull dog revolvers and told young O'Brien to drop the valise or he would get the contents of the bull dog revolver in his head. There was no alternative but to do as requested as father and son were not prepared for such an emergency. The highway men not content with the plunder would not let the robbed men go their way, but ordered them back from whence they came. They returned but not cheerfully. Detectives have charge of the case.

RHEUMATISM NERVOUS DISEASES CAN BE CURED

ELECTRICITY, AS APPLIED BY THE OWEN ELECTRIC BELT AND APPLIANCES,

is now recognized as the greatest boon offered to suffering humanity. It is fast taking the place of drugs in all nervous and rheumatic troubles, and will effect cures in seemingly hopeless cases where every other known means has failed. It is Nature's remedy, and by its steady, soothing current that is really felt, POSITIVELY CURES: Nerves, Prostration, Rheumatism, Sciatica, Kidney Disease, Varicose, Lumbago, Lame Back and Dyspepsia.

RHEUMATISM

"For twenty years I have been a martyr to rheumatism, suffering at times the most agonizing pains, from which I could get no relief, for doctors' medicines, painkillers, etc., had no effect on me, and it was only when I got the Owen Electric Belt that I began to get well. I am thoroughly cured, and have been so for months. The Belt's action was most marvellous, removing the pain in a few days."—H. SUNDEN, 21 Vauxhall Street, Toronto.

NERVOUS DISEASES

Thousands of people suffer from a variety of nervous diseases such as Neuritis, Weakness, Impotency, Loss of Memory, etc., that the old modes of treatment fail to cure. There is a loss of nerve force, power that cannot be restored by any medical treatment, and any doctor who would try to accomplish this by any kind of drugs is providing a dangerous harm to his patients. Electricity, as applied by the Owen Electric Belt and Suspension—Is the only known and safe agent that will supply what is lacking, namely, nerve force or power, impart tone and vigor to the organs, and restore to healthy action the whole nervous system.

KIDNEY DISEASE

"Your Belt has done wonders for me. It stopped the bleeding of my kidneys, which were so bad that he doctors failed to help me. I am satisfied it saved my life, and I am a wonder to everybody who knew how bad I was."—W. PATTERSON, Mississauga, Ont.

LUMBAGO AND LAME BACK

"The life saving of my doctor, after everything else failed, I got an Owen Electric Belt for a severe attack of lumbago and lame back. At that time I was so bad I could not stand up without assistance on any side of the pain. After wearing the Belt for a short time the pain was all gone and I am as well as ever. I know it was the Belt cured me, and I would not be without it for \$50."—W. J. LEWIS, conductor C.P.R., Owen Sound, Ont.

DYSPEPSIA

"For over four years I have been a sufferer from indigestion, catarrh and nervous prostration, and have tried all the doctors and drugs without any benefit. I purchased the Owen Electric Belt, and after wearing it about three months ago, and have worn it since with the most beneficial results. I am perfectly well and free from every trouble."—A. McDougall, Seattle, Wash.

WE CHALLENGE THE WORLD

To show an electric belt where the current is under the control of the patient as completely as this. We can use the same belt on an infant that we would on a giant by simply adjusting the current. Our Belts have been in the market for five or ten years longer, but no one has been able to equal them in safety and comfort. I know it was the Belt cured me, and I would not be without it for \$50."—W. J. LEWIS, conductor C.P.R., Owen Sound, Ont.

BEWARE OF IMITATIONS AND CHEAP BELTS

Our Trade Mark is the portrait of Dr. A. Owen embossed in gold upon every Belt and Appliance manufactured by the Owen Electric Belt and Appliance Co. None genuine without it. SEND FOR CATALOGUE. MAILED (SEALED) FREE.

FALL OPENING

SEASON 1892.

Six years ago when I started business on the cash plan, other merchants gave me three months to last. I am here yet and have pretty well demonstrated the fact that the people of Moose Jaw will pay cash if by doing so they can save money. This system has enabled me to throw on the market large lots of goods purchased from large wholesale stocks, parties retiring from business, and overloaded manufacturers. These I have sold at low prices at the same time selling regular goods at from 10 to 25 per cent. less than other dealers. I shall continue this method of doing business regardless of croakers.

I will have auction sales on the following dates:

OCTOBER 8TH, 15TH, 22ND AND 29TH,

OF

Cook-stoves, Heating-stoves, Stove Furniture, Cutlery, Brushes, Brooms, Etc., Etc.

I have just received a car-load of all kinds of stoves. Another car-load is on the way. These goods are to be sold at the lowest prices. Call and see my stock.

FOR CASH ONLY.

Thanking you for past patronage.

Yours truly,

W. R. CAMPBELL

FRIDAY, NOVEMBER 25, 1892

LOCAL AND GENERAL NEWS.

Winter in earnest.

Fifty-one cents was paid yesterday for wheat f.o.b., Boharn.

Our country correspondents are exceedingly quiet this week.

Attention is called to the advt. of W. D. Palmer in another column.

About ninety cars of wheat have been shipped from this point since the wheat commenced to move.

Messrs. Geo. Clements and "Sandy" Garrison, of Saskatoon arrived in town on Monday.

The cold weather has increased the output of coal. It is a difficult matter to keep a sufficient supply on hand.

Leslie McDonald left last week for the Portage where he will be employed by the Massey-Harris Co.

Mr. Humphris of Winnipeg was in town this week on business connected with his book trade.

For SALE—An organ in good repair. Has been used for church purposes in Church of St. John the Baptist. Cheap for cash.

The Ladies' Aid of the Presbyterian Church will hold their annual Bazaar and Supper in Campbell's Hall on the evening of Dec. 9th.

Mr. Chas. Nicolle of Two Rivers Ranch has purchased the herd of horses and cattle owned by Mason Bros.

Mr. W. W. Bole's new drug store is now fitted up and presents an appearance that is a credit to Moose Jaw. Competent judges pronounce it the finest drug store in the Territories.

During the cold spell this week it was found necessary to send some of the classes home from school as it was impossible to warm the side of the building on which the wind blew.

The rush of passengers to the old country still continues. Quite a number left this week for Liverpool and Glasgow ticketed through by J.K. Stevenson, agent C.P.R. Steamers now leave Halifax, Portland, Boston and New York.

Mr. J. A. Calder, principal of the Moose Jaw High School is busily engaged in mounting a complete collection of Prairie flowers. When completed the collection will be sent to the World's Fair as part of the Moose Jaw exhibit.

Mr. Haultain passed Moose Jaw on his way west on Tuesday morning. In conversation with the Times he stated that the strength of parties in the Assembly remains unchanged since the Wallace election, namely, fourteen to twelve. It is rumored, however, that the Opposition will number eighteen when the House meets. Mr. Haultain stated that it was probable that Governor Royal would not continue the practice of calling one member to form an executive committee, but would have the Assembly itself to select its committee, as is provided by the North-west act.

Some twelve miles east of Willow Bunch, south of Moose Jaw, very promising evidences of petroleum have been discovered. The black oil oozes out of the bank of a ravine and is carried away by the waters of a small creek. Father St. Germain, O. M. I. reports that quicksilver in considerable quantity has been discovered in the same vicinity.

Mr. Manley of Parkburg, has just received from Mr. John Houston of Manitoba, two fine young stallion colts and their mothers, one a Clydesdale, six months old, weighs 725 lbs., and its mother who has taken two firsts and two special prizes at South Brandon and Turtle Mountain Agricultural Shows. The other mare is a high grade Percheron and the colt is a cross by an English Shire.

A special meeting of the Salvation Army will be held in Campbell's Hall on Dec. 1st. The meeting will be conducted by Brigadier and Mrs. Margot. The brigadier for a number of years has been acting as Training Garrison Principal in Toronto and has a good experience in S. A. work. They are very energetic leaders and able speakers and will doubtless be able to interest their hearers. Admission 10 cents.

## RAILWAY RIPPLES.

The Rippler has been on the ragged edge of apprehension all this week for he was informed that someone was after his scalp. However he proposes to discharge the duty he owes to society and so he must "keep shooting."

Firstly, then, why was R. J. in such a hurry the other night that he couldn't wait for his train book?

"Just one song more!"  
"Twas a summer night,  
And one of the boys  
Was in a sad plight,  
And tho' the thing  
Was scarcely right,  
He sweetly warbled,  
"Lead, kindly Light!"

"Who'll take the scale?"  
Is a question now,  
That some one ponders  
With wrinkled brow.  
In Alaska or Moose Jaw,  
Tis equally true,  
Who'll take them?  
Echo answers, who?

No one could be crosser  
Than Charlie P—  
When he found that his oysters were taken,  
As he started for more  
He stamped and he swore  
And with anger was fairly shaken.

But when his well-known good-nature asserted itself he merely made the remark that the man, whoever he was, might have had the decency to return the quart measure.

Who was the suave individual who smoked the short clay pipe and talked so fluently about Texas and Arkansas?

Who stole the old gentleman's new overshoes?

## Nearly a Dead-LOCK.

On Monday evening an interesting discussion occurred in the council chamber. Rumors were afloat next day that Moose Jaw was without a mayor. A representative of the Times promptly interviewed Mayor Rorison.

"Is there any truth, your worship, in the rumor that you have resigned?"

"None whatever. The misunderstanding was briefly this:—It is generally well known that the fire limit by law prohibits the erection of wooden buildings. A small carpenter shop had been erected but in a place where it was isolated. I did not think this a case where the letter of the law should be enforced. Some members of the council evidently did, and brought in a motion to the effect that the Town Inspector should enforce the provisions of the by-law without consulting any person. I thought this rather overstepped the mark, and said so."

"Are you in the field for the Mayoralty next year, Mr. Rorison?"

"Most emphatically, no!"
